## Experience

### Frontend Developer

Kopertis Wil. 4 Jabar - Banten

Bandung, West Java, Indonesia
Aug 2016 - July 2017

KOPERTIS is a government agency that aims to coordinate private universities in the provinces of West Java and Banten.
I work in team as a frontend developer to build web application that validate students data in every universities.
i used Bootstrap 3 and Semantic UI as my framework.
Working as frontend developer makes me know how to create website effective for the user.

### Fullstack Developer & Teacher

Children's House (Yayasan Cendekia Harapan)

Badung, Bali, Indonesia
Mar 2018 - feb 2019

Children's House is an educational foundations ranging from kindergarten, elementary, junior high, and high school.
As a developer, I created student value system that can be sent to parents immediately. And i also create UKS Application for android.
Working as fullstack developer makes me more understand how to provide data and application requirements to make my backend developer working faster.
As a teacher, I taught ICT Subject and Design & Technology Subject.

### Freelancer

Remote

2019 - 2025

I start my freelancer career in 2019 and focusing in full stack web developer. From here, I start to become a system consultant to build web application for personal client, small business and middle up level business.

### Full Stack Engineer

Yayasan Al Ma'soem Bandung

Bandung, West Java, Indonesia
Desc 2019 - Nov 2022

Yayasan Al Ma'soem Bandung is an education-based company since 1986. The System Information Unit started in 2019, where I joined as a Full Stack Engineer. I gather user needs, create detailed project briefs, then coordinate with the team to analyze, design, and implement the solution. I handle both front-end and back-end development, database design, and deployment, ensuring the applications are efficient, maintainable, and aligned with stakeholder needs.

### Project Manager

Yayasan Al Ma'soem Bandung

Bandung, West Java, Indonesia
Nov 2022 - Now

As a Project Manager, I oversee all aspects of software development—from system analysis and backend/frontend development to quality control. Beyond project delivery, I am also responsible for team management to ensure performance aligns with targets and outcomes meet expectations. I take full responsibility for maintaining clear communication within the team and with stakeholders to ensure smooth project execution.

### Full Stack Engineer
Business Partner

Nirwasita Dharma Cendekia

Bandung, West Java, Indonesia
Sept 2025 - Now

Nirwasita Dharma Cendekia is an organization focused on child counseling and their psychological development. As a programmer, my role is to build the digital infrastructure that serves as a support system for the activities of the Nirwasita Dharma Cendekia counseling team, as well as for all Guidance and Counseling (BK) teachers across Indonesia.

## Education

## Portofolio

### Aman Palestin

https://amanpalestin.id
laravel - jQuery - bootstrap - MySQL

amanpalestin.id is a donation platform that also features profiles and news related to Palestine.
As a Frontend Developer, I built the entire profile section of the website and integrated data from APIs to be displayed on the main site. This project was developed using Laravel, Bootstrap, jQuery, and MySQL, with Midtrans integrated as the payment gateway.

### PMB Ma'soem University

https://pmb.masoemuniversity.com

https://admin-pmb.masoemuniversity.com

laravel - jQuery - bootstrap - PostgreSQL

As part of Yayasan Al Ma'soem Bandung, my first project was developing the New Student Admission (PMB) system for Ma'soem University. The platform allows students to register online, view their first-year tuition fees, make payments via the integrated PintroPay gateway, and take online entrance exams.
I was responsible for system analysis, database design, UI/UX design, and frontend development. The project was built using Laravel, Bootstrap, jQuery, and PostgreSQL.

### Telemarketing Ma'soem

https://telemarketing.masoemuniversity.com

laravel - jQuery - bootstrap - PostgreSQL

Telemarketing is a web-based customer data management system that enables admins to track and manage registration outcomes. Built with Laravel, Bootstrap, jQuery, and PostgreSQL, it efficiently processes and analyzes over thousands customer records.

### SIAKAD Ma'soem University

https://siakad.masoemuniversity.com

https://admin-siakad.masoemuniversity.com

laravel - jQuery - bootstrap - PostgreSQL

SIAKAD is a student academic and financial records platform. All settings and validations are managed via the admin panel, while students can view their final grades, register courses (KRS), and make payments online. Validation occurs at three levels—frontend, backend, and database—to ensure data integrity.
Built with Laravel, Bootstrap, jQuery, and PostgreSQL, the system is integrated with PintroPay for seamless payment processing.

### Point of Sales Koperasi MBS

https://pos.koperasimbs.com
laravel - jQuery - bootstrap - node js - MySQL

Koperasi MBS is a community-owned cooperative in a village of East Nusa Tenggara. I developed a simple Point of Sales system covering purchasing, sales, inventory, operational expenses, reporting, and member management. The system features a loyalty program where members earn points with each purchase that can be redeemed for discounts.
Built with Laravel, jQuery, Node.js, and MySQL, it streamlines supplier orders, automates stock updates during sales, tracks operational costs, manages member points, and generates reports from daily summaries through annual overviews.

### VPS & DNS Management

I manage virtual private servers using cPanel, WHM, and aaPanel, handling setup, optimization, security hardening, and regular backups. I also configure and maintain DNS records for domains, ensuring reliable resolution, SSL issuance, and smooth email delivery.

### WhatsApp Bot

nodejs - expressjs

I develop WhatsApp bots using Node.js that enable broadcast messaging for marketing campaigns and reminders, sending updates and promotions to multiple contacts efficiently. I implement auto-reply features for customer service, handling inquiries instantly with customizable templates via WhatsApp Web JS or cloud APIs. These bots leverage libraries like whatsapp-web.js and integrate with messaging gateways to ensure reliable delivery and avoid detection, boosting engagement and responsiveness for both advertising and support
